

## PRODUCT INFORMATION

Intranet DASHBOARD (iD) comes complete with a bundled suite of over 40 clever intranet tools and applications. Deploy from this feature rich suite, and immediately streamline communication and information in your organization. Once cumbersome tasks are made simple and accessible from your browser, and productivity and efficiency gains are immediately realized.

The current suite of iD applications on offer is extensive and constantly evolving. We challenge you to find a more comprehensive ready-made suite of functionality. Listed below are just some of applications on offer as part of iD.

For more information, including a personalized trial or demonstration, visit [www.intranetdashboard.com](http://www.intranetdashboard.com) or contact

## CONTENT MANAGEMENT/PUBLISHING TOOLS

### iD CMS

A WYSIWYG (What You See Is What You Get) web content management system. iD CMS enables publishing and collaboration across your organization.

### Enterprise Search

A powerful new search engine within iD that performs seriously fast and accurately. Enterprise Search will search content contained within your iD intranet as well as shared drives.

### News

Publish important company news items and information across various areas of your intranet.

### RSS News Feeds

Tailor content on your intranet to suit different audiences. Subscribe to external news feeds.

### Ad Manager

Create and display banners on your intranet to advertise everything from the company family day to your latest product launch.

### Layout Manager

Customize the layout of your intranet using drag and drop.

### iD Themes

Customize the look and feel of your intranet. It's easy to change the colors, images, branding and design using customizable templates.

### Statistics Reporter

View comprehensive statistics and metrics which provide vital feedback on the major components of your intranet.

### Nav Editor

Facilitate simple and intuitive navigation through your site and subsites.

## COLLABORATION/COMMUNICATION TOOLS

### Wiki

Create collaborative environments in which end users can simply and easily create, edit and link between web pages in an online environment.

### FAQs

Create organized and searchable lists of answers to frequently asked questions. Users also have the ability to comment and rate the usefulness of information.

### Feedback Director / Form Builder

Maintain multiple levels of email feedback throughout your intranet ensuring the message is sent to the relevant recipient. Create simple online forms for any purpose.

### Quick Poll

Find out what matters most to your employees with an informal polling tool. Create single or multi-question polls and view live results.

**COLLABORATION/COMMUNICATION TOOLS****Quicklinks**

Create your own customized list of hyperlinks to frequently used internal or external pages. Multiple instances can also be displayed on the page within categories to aid navigation.

**Forum**

A multi-threaded online discussion forum, which allows users to share ideas, post questions and have general discussions.

**World Time**

Co-ordinate your meetings with the rest of the world by discovering what time it is in every major city.

**Sports Tipping**

A powerful and adaptable sports tipping engine to help you run an intra-company tipping competition for many sports and competitive activities.

**e-Postcards**

Send messages, invitations, greetings and more to anyone in your organization with a series of topical e-Postcards.

**Staff Offers**

A 'classifieds' listing which enables you and staff to share unique offers, tickets, and goods to other members of your company.

**e-Newsletter**

Create, send and maintain e-Newsletters and associated subscription lists, via an easy to use interface.

**Localization**

Front end language localization with custom XML language documents.

**Travel Agent**

A virtual 'travel agent' which allows users to research eating locations, accommodation and travel news. Users can also submit their own recommendations and ratings.

**BUSINESS TOOLS****Document Manager**

Document Manager is a catalog and storage system for all of your company's documentation that includes version control and check in/check out. Organize your files in a central repository for fast and efficient retrieval.

**Meeting Room Booking**

Maintain and manage an electronic booking system for your company's meeting rooms including facilities, catering and other resources.

**Company Calendar**

A company-wide calendar to maintain company events, public holidays, pay days and other company-wide relevant dates. Integrate them with individual personal schedules.

**Survey Manager**

Create and conduct a range of web based survey/questionnaires of varying length or complexity. Results can be displayed in a number of pre-formatted or customized reports.

**Process Tool**

The Process Tool is an application that allows you to create processes by grouping any number of webpages in a logical, controlled flow. You can also track users through processes created.

**Contacts Manager**

Maintain and manage contacts. Share them with other parts of the business and maintain your own frequently used list.

**BUSINESS TOOLS****File Express**

Avoid firewall email size restrictions by using File Express to distribute large files to multiple recipients.

**Digital Assets Library**

Catalog and maintain presentations, videos, multimedia, and audio.

**Forms Manager**

Forms Manager allows you to co-ordinate groups of forms required for specific tasks. Streamline administrative processes by storing all forms in a single location.

**Project Space**

Project Space is an online workspace built for project teams. It allows online collaboration on projects, virtual team activities and group discussion across the organization, regardless of location.

**People Search**

An internal contacts database for your organization comprising phone numbers and contact details of every person in your company. Swiftly locate anyone in your organization using People Search.

**Brand Manager**

Brand Manager is an important resource for organizations to manage their most important asset, their brand/logo/identity.

**Image Library**

Manage company imagery and graphics for your internet/intranet sites.

**Acronym Manager**

Maintaining an updatable list of industry/company related terms and definitions has never been easier.

**Employee Training**

Search and maintain a list of internal and external courses available for staff. Manage course applications.

**iFrame Portlets**

Use iFrames to access other web applications within the iD look and feel.

**Extranet (User) Manager**

Enhance your intranet with extranet capabilities. Manage external access by assigning secure passwords and folder permissions in applications such as Forms and Document Manager.
